Greater Noida,UttarPradesh,India

## Summary

Motivated Computer Science and Engineering Student with a foundational understanding of Data Structure,Algorithms,and programming in Java.Experienced in building academic projects and eager to strengthen problem solving skills and contribute to real world software development.

## Education

- **Dr.APJ Abdul Kalam Technical University** *2023 - 2027*
  *Bachelor of Technology(B.Tech), Computer Science Engineering* Lucknow, India
  - GPA: 6.2/10.00(till 6th sem.)
- **Dr.Ram Tirth Dube Memorial Senior Secondary School** *2022*
  *Senior Secondary(Class 12, CBSE)* Fatehgarh(U.P.),India
  - Grade:72.6%
- **Dr.Ram Tirth Dube Memorial Senior Secondary School** *2020*
  *Secondary (Class 10, CBSE)* Fatehgarh(U.P.),India
  - GPA: 84.8%

## Projects

- **Project: [LinkForge - URL Shortener]** *2026*
  *Tools: Java, Spring Boot, PostgreSQL, REST APIs, Maven* [ ]
  - Developed a URL shortening service with custom short codes and URL redirection.
  - Implemented URL expiration, input validation, and exception handling.
  - Integrated PostgreSQL to store URLs and track click counts.
- **FaceAttend AI – AI-Based Facial Recognition Attendance System** *2026*
  *Python, Flask, InsightFace, OpenCV, PostgreSQL, NumPy, ONNX Runtime* [ ]
  - Developed an AI-powered facial recognition attendance system using InsightFace and OpenCV to identify registered students through real-time camera input.
  - Implemented face embedding generation and cosine similarity matching to improve recognition accuracy and reduce false identification.
  - Built a Flask-based web application with browser camera integration for student registration, face-sample capture, recognition, and attendance management.
  - Integrated PostgreSQL to securely store student profiles, attendance records, timestamps, and configurable attendance-period settings with duplicate-attendance prevention.
  - Implemented liveness detection to add an anti-spoofing layer against attempts using static photographs.
  - Developed attendance analytics to calculate attendance percentages, daily records, student-wise history, and attendance trends from a configurable start date.

## Skills

- **Programming Languages:** Java,Python
- **Core Concepts:** Data Structures, Algorithms, OOP, DBMS, Operating System,System Design
- **Web Technologies:** HTML , CSS, JavaScript
- **Tools:** GitHub, Git, VS Code
- **Databases:** MySQL, Postgresql
- **Problem Solving:** Solved 300+ problems on LeetCode

## Certifications

**SQL (Basic) – HackerRank** *2025*
**Problem Solving (Basic) – HackerRank** *2025*
**Generative AI Fundamentals Badge (Google Cloud Skills Boost)** *2025*

## Additional Information

**Languages:** Hindi(Native),English
